

**Lake Metroparks Wildlife Center
Junior Volunteer Program
Ages 13-17**

Program runs from June-August

Come join other area teens to learn more about helping injured and orphaned native wildlife. You will learn about orphan care, habitat and nutritional needs of those animals under our care. You will get a chance to feed and care for baby bunnies, squirrels, songbirds, waterfowl and other Ohio wildlife species. Working directly with our education staff you can learn skills for training/enrichment of our program animals. Many of the knowledge and skills you acquire at the Center can help you with your future goals if you are planning on pursuing a career in biology, wildlife management, naturalist, zoology, etc., or just come have fun while giving back to the wildlife community.
